

DEGACOTE ACCELERATOR 101

SECTION 2

PRODUCT INFORMATION BULLETIN

Revised September 2011

DESCRIPTION

Degacote Accelerator 101 is a thin yellowish liquid designed to increase the reactivity of Degacote Reactive Resin Systems.

USE

To increase the reactivity of Degacote and Degadur products:

- in the temperature range +10⁰C to -30⁰C,
- of part "A" in 2 component sprayable systems.

PROCESSING

Add to the selected Resin System prior to the addition of Degacote Hardener Powder and stir thoroughly.

USAGE

Amount depends on the selected coating system and the temperature. Your TCP Representative can advise.

SPECIAL NOTES

1. **Under no circumstances should Degacote Accelerator 101 and Degacote Hardener Powder be stored together.**
2. Direct contact between Degacote Accelerator 101 and Degacote Hardener Powder will cause an explosion.

TERMS AND CONDITIONS OF SALE

All statements, technical information and recommendations contained herein are based on tests we believe to be reliable, but the accuracy of completeness thereof is not guaranteed, and the following is made in lieu of all warranties, express or implied.

Sellers and manufacturer's only obligation shall be to replace such quantity of the product proved to be defective. Neither seller nor manufacturer shall be liable for injury, loss or damage, direct or indirect or consequential, arising out of the use of or the inability to use the product. Before using, user shall determine the suitability of the product for his intended use, and user assumes all risk and liability whatsoever in connection therewith.

Statements or recommendations not contained herein shall have no force or effect unless in an agreement signed by officers of seller and manufacturer.
